ANTI-THEFT FOR MOBILE

Prevent misuse of your information

You can't always prevent your mobile from being lost or stolen, but you can make sure no one takes advantage of it. With F-Secure Anti-Theft for Mobile you can be sure that your personal and confidential information won't be misused by anyone.

Powerful features to secure and locate your phone

With F-Secure Anti-Theft for Mobile, you can remotely lock the phone and protect the information it contains with a single SMS message. With the help of the new remote locator feature, you always know where your phone is located. If the phone is stolen and the thief changes the SIM card, the Theft Control feature locks automatically the phone and informs you of the new number. As an ultimate safety measure to prevent misuse, it is possible to erase all the data on the phone with Remote Wipe.

Easy to upgrade

F-Secure Anti-Theft is easy to upgrade by activating the in-built automatic upgrade system which adds new security features to your solution for an additional fee. You can see the currently available additional security features directly from the solution's user interface.

With F-Secure Anti-Theft for Mobile you can

- Lock your phone remotely
- Locate your phone remotely
- Erase the confidential data remotely
- Get informed who stole your phone

Key features

- Remote Lock, Locate and Wipe
- Theft Control
- Local Lock
- Easy to upgrade with additional security features
- Easy to use

Supported platforms

- Symbian
- Windows Mobile
- Android

HOW TO SECURE AND LOCATE YOUR PHONE IN CASE OF LOSS OR THEFT

You can lock, locate or wipe your phone remotely with a SMS message. Remember to define your codes to the antitheft settings before using commands.

If the SIM is changed, the thief's number is automatically reported to you.

Remote lock: #LOCK#<your code>
Remote locate #LOCATE#<your code>
Remote wipe: #WIPE#<your code>
