F-SECURE INTERNET SECURITY 2013

Complete protection for your computer, identity an online life

Complete security suite with award-winning cloud-based technology. It protects you against all existing online threats and responds to new threats effectively as they appear. Easy to install and does not slow down your computer. Online chat and phone support are provided in case of any questions.

Instant protection against all new threats

The amount of unique malware and new web sites is growing extremely fast. Protection based solely on obtaining a copy of a malware file or analyzing a unique URL is no longer sufficient.

To make sure that you are protected against modern and complex threats, we are constantly improving our detection and protection technologies. F-Secure Internet Security 2013 can make more sophisticated and accurate decisions based on how common certain files are.

Advanced real-time cloud-based technology

Web traffic scanning protects you against advanced malware using browser exploits. The browsing protection feature tells you clearly which web sites are safe to enter and which are better to avoid. The cloud-enabled anti-virus has multiple scanning engines that detect harmful files and malicious content on your computer. DeepGuard™ cloud computing technology ensures the fastest protection against all new threats. The features are working also without a network connection.

Redesigned, user-friendly firewall functionality

The firewall functionality and user experience have been redesigned in F-Secure Internet Security 2013. The main design principle has been providing both easiness of use and best protection. The user does not have to be a network expert. The users are automatically allowed to access other devices within their home network.
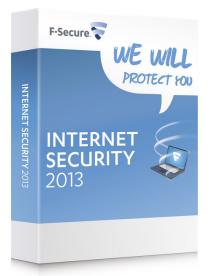

Key Features

Computer Security

- Advanced real-time cloud-based technology against viruses, spyware and other malicious attacks
- Secure user-friendly firewall to prevent hacker attacks
- Constantly up-to-date with pioneering technology
- Instant protection against all new threats
- Blocks spam and phishing email
- Protection against identity theft and unwanted mobile broadband bills

Online Safety

- Browsing protection blocks harmful sites automatically
- Parental control protects your children
- Personalized settings for each user

F-Secure®
