

## F-SECURE ONLINE BACKUP

**We will protect your important files. Backup, access and share your files safe and easy.**

F-Secure Online Backup is a simple and easy way to backup your content, access it securely from anywhere on the web safely and share it directly with friends through social media.

### Worry-free automatic backup always on

All important content on your PC is stored securely online. The files are securely stored and transferred securely to online data centers. Because F-Secure Online Backup securely stores your data online, you also safeguard your files against possible computer failure or loss/theft. Backup DVDs or using external hard drives do not offer this added benefit.

### Easy to install and use

It is fully automated, working in the background whenever you connect to the Internet. Be honest, Is your digital content safe if your hardware is lost or malfunctions?

Everyone knows that taking regular backups is important but few of us have the time or the expertise required to set up a working system to take care of this important aspect of data security.

### Let us do it for you - automatically

F-Secure Online Backup relieves you from having to take frequent backups of your pictures, music and other important content. It works automatically in the background whenever you are connected to the Internet, backing up all your important data safely online.

### Key Features

- Worry-free automatic backup always on
- All your files stored securely online
- Easy personal access to your files
- Safe sharing of your backed up content
- Easy to install and use
- Online chat or phone support
